

Curriculum vitae of Mariusz Smętek

Mariusz Smętek has 21 years of experience in insurance market supervision. Since 2010 has been Director of Risk Monitoring Department at the KNF – the Polish Financial Supervision Authority. His area of main interest includes stress testing, ratings, financial analyses, early warning systems, insurer's databases and reporting, econometrics, modelling and forecasting of financial markets.

In this capacity he led many projects improving the quality of supervision in Poland by developing the methods and tools for supervisors and insurance undertakings. He was responsible i.a. for elaboration of assumptions, development and implementation of Early Warning System, methodologies for the stress-testing, principles of ratings and financial analyses of insurance companies, analyses of insurance sector, reporting of insurance companies, gathering and processing of data, automation of the process of supervising insurance undertakings, dealing with IT systems and creating advanced analytical tools.

Moreover he was supervising the work of project managers for many important projects during the move from Solvency I to Solvency II regime, i.a. the policy work on Solvency II project, or development of the first Risk Assessment Framework.

Since the EIOPA was established he has been an alternate member of the Board of Supervisor of EIOPA and since 2016 is a member of the Risk and Financial Stability Committee of EIOPA. At CEIOPS times, he was a member of Solvency II - Insurance Groups Supervision Committee

He has also been an active at Polish and European professional bodies, i.a. Insurance and Pension Fund Statistics Working Group of EUROSTAT, solvency II working groups at the Polish Ministry of Finance and at Polish Chamber of Insurance.

He has been sharing his experience, as a short term expert, during the projects for: the Bulgarian, Russian and Moldavian insurance supervision authorities in the scope of insurance reporting, financial analyses and analytical tools. He is co-author of two books on financial analysis, numerous journal articles and conference papers.
