General Comments	The numbering of the “Template for Comments” is off and not correct. Comments on guidelines below run to 1.96. The guidelines run to 1.92. Further concerning the QRT it would be preferable to be able to submit the whole of the developed report, i.e. any deduction of information not required during phasing-in would be done by the recipient(s). Another procedure may lead to that already developed solutions may have to be rebuilt just for the phasing-in period, which would be costly and require significant resources.
