

EIOPA Occupational Pensions Stakeholder Group

Onno Steenbeek

I am the Managing Director of the Strategic Portfolio Advice department at APG Asset Management. This department (35fte) is responsible for APG's advisory services on Asset Liability Management (ALM) and strategic asset allocation for associated pension funds, managing a total of approximately 570 billion euros in assets (December 2023). The department also plays a central role in the implementation of the reforms of the Dutch pension system and is responsible for executing EIOPA stress tests.

In addition to my primary position at APG, I hold a part-time Chair in Pension Fund Risk Management at the Erasmus University School of Economics in Rotterdam, The Netherlands. Besides lecturing on various finance subjects, I conduct academic research and publish books and articles.

Alongside my affiliations with APG and Erasmus University, I have been a member of EIOPA's Occupational Pensions Stakeholder Group since 2019.
