

## Annex IV

### S.29.01 - Variation Analysis - Analysis of Variation of Excess of Assets over Liabilities

#### General comments:

This Annex contains additional instructions in relation to the templates included in Annex I of this Regulation. The first column of the next table identifies the items to be reported by identifying the columns and lines as showed in the template in Annex I.

This annex relates to annual submission of information for third country branches.

This template explains the variation of Excess of Assets over Liabilities by reconciling the different sources of movements (please see the five main sources in b) below). In these templates, creation of value needs to be reported (such as income from investments).

The content of this template covers:

- a) A presentation of all variations in Basic Own fund items during the reporting period. It isolates the variation of the Excess of Assets over Liabilities as part of this total variation. This first analysis is entirely performed based on information also reported in template S.23.01 (year N and N-1).
- b) A summary of the 5 main sources affecting the variation of the Excess of Assets over Liabilities between the prior and the last reporting periods (cells C0030/R0190 to C0030/R0250):
  - The variation related to investments and financial liabilities – detailed in template S.29.02,
  - The variation related to technical provisions – detailed in templates S.29.03 and S.29.04,
  - The variation of “pure” capital items, which is not directly influenced by the business carried on (e.g., variations in ordinary shares numbers and values); these variations are analysed in detail within template S.23.03;
    - Other main variations linked to tax and dividend distribution, namely:
      - Variation in Deferred Tax position
      - Income Tax of the reporting period
      - Dividend distribution
    - Other variations not explained elsewhere.
